Output voltage programming options

A. Internal potentiometer

- **Red**
  - 4.75V to +6V
  - 8mA typical
- **Black**
  - 0V
- **Yellow**
  - Monitor
- **White**
  - 0 to +1.8V

B. External voltage

- **Red**
  - 4.75V to +6V
  - 8mA typical
- **Black**
  - 0V
- **Yellow**
  - nc
- **White**
  - Control
  - 0 to +1.8V

nc: no connection - isolated lead

Monitor: 1/1000 of voltage applied to photomultiplier anode (a)
