

#### **DESCRIPTION**

The DMO09OC photodetector module comprises a 25 mm diameter end-window photomultiplier tube with red sensitive S2O photocathode with low dark counts, a positive high voltage power supply and a high speed amplifier discriminator. The model includes a counter and microcontroller with USB interface. All are encapsulated within a rectangular metal case with connectors for power input and USB signal output.

### **FEATURES**

- Easy to operate
- Compact rectangular assembly
- Electrostatic shielding
- Operates from low voltage supply
- Preset discriminator level and HV
- Fully enclosed high voltages
- Only 500 mW total power dissipation (typical)
- 70 MHz count rate capability
- Wide dynamic range

### **APPLICATIONS**

Intended for ultra-low light measurement applications requiring single photon detection. Utilises a USB interface to a host computer.

#### ACCESSORIES

- Adaptor for SMA terminated optical fibre, type
  DMSMA
- Universal ac power adaptor, type PSU5V-3A
- USB cable with type A male plug

### **CHARACTERISTICS**

PHOTOCATHODE TYPE	OUTPUT
S20	USB
PHOTOCATHODE ACTIVE DIAMETER	CONTROL
22 mm	see user manual
<b>SPECTRAL RESPONSE RANGE</b>	<b>INPUT VOLTAGE</b>
280 to 850 nm, see curve	+4.75 V to +5.25 V
<b>PEAK QE AT 400 NM</b>	WEIGHT
18%	200g
<b>DISCRIMINATOR LEVEL</b>	OPERATING POSITION
-2 mV	Any
<b>DARK COUNTS AT 20 °C (TYP.)</b>	<b>POWER INPUT AT 10<sup>7</sup>S<sup>-1</sup></b>
1000 s <sup>-1</sup>	+5 V, 100 mA
<b>DARK COUNTS AT 20 °C (MAX.)</b>	<b>WARM UP TIME</b>
5000 s <sup>-1</sup>	< 10s
<b>FINISH</b> Case, black powder coat, front plate, black anodised	TEMPERATUREOperating+5 °C to +55 °CStorage-40 °C to +55 °C

### **USER I/O CONNECTIONS**

TTL input and output lines are available for control of the module and to command peripheral operations.

**TRIGGER INPUT** Start command for cycle defined by software

#### **USER OUTPUT**

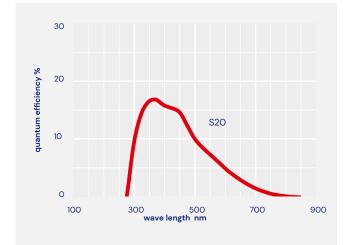

5V logic output for user applications. For example: activate shutter; busy indicator

# PHOTOCATHODE SPECTRAL RESPONSE

# DYNAMIC RANGE

Typical counting sensitivity for DMOO9OC at 400 nm. Note that automatic dead time correction has been applied at high count rates. The dynamic range can be further extended at low count rates by dark count subtraction in the software.

## INSTALLATION AND OPERATION

Each module is supplied with test data. Wherever possible carry out installation in subdued light.

Remove the protective cap from the window of the module. If necessary, clean the photomultiplier window using a lens tissue moistened with alcohol. Do not use any other solvent.

# USER MANUAL AND SOFTWARE LINK

A manual giving detailed instalation, start-up, software link and programming procedures is supplied by e-mail after receipt of purchase order.

## **TEST DATA**

Module test data is supplied on request.

# INSTALLATION AND OPERATION CONTINUED...

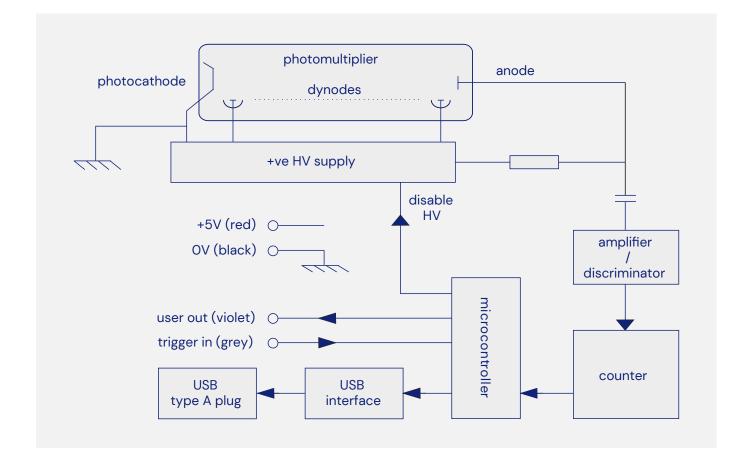

Mount the module and make power input and signal connections.

Do not expose the photomultiplier tube photocathode to strong lights while the module is energised.

#### WARNING

Do not attempt to repair or dismantle this product. High voltage used within the module presents an electric shock hazard.

Do not operation beyond the maximum ratings, or reverse the input voltage; this may result in loss of performance or permanent damage to the product.
